Summary

SafeEx digitises all inspection routines

SafeEx Cloud has been developed by inspectors for inspectors **based on domain knowledge and +10 years of global experience.**

Based on own experience and current references, it is possible to **save up to 50% of the man-hours** spent on inspections and maintenance cost.

Improved health, safety, environment and quality

Minimize expenditure

Increase tool time

Activity tracking and access to information and documentation

Can work as a standalone system or be interfaced directly with client's ERP, Engineering tool, etc.

Regulatory Compliance Checks – we assure you are always updated

Non-Regulatory Compliance Checks

WHY SAFEEX IS THE

Right choice

We focus on your needs

- We support our clients with turnkey solutions where required.
- SafeEx creates flexible & scalable solutions, allowing our clients to work independently (optional) or through integration(s).
- Hands on approach – customers can discuss ideas with developers and hands-on Engineers, we understand your needs.
- We are experts in the hazardous area segment 24/7 - 365 support.

SafeEx is a specialised and recognised inspection and maintenance solution

GOOD REFERENCE LIST – PROVEN AND WELL DOCUMENTED RECORD

- **Australian Offshore Regulator** stating SafeEx best in class.
- **3rd party verification inspection company**, the SafeEx tool constitutes a great improvement in the management of the inspection of Electrical Equipment in Hazardous Areas.
- **Petronas** - The main reason we purchased the SafeEx software was ease of use, user friendliness and a significant reduce in man-power for the inspection part.
- **Seadrill**, we have been very impressed with SafeEx' "can do" attitude.
- **Total, UK (TEPUK)** estimates a total saving of 30% (All UK assets and by use of multiple plant maintenance routines).
- **BHP** doubled the inspection flow
