

[Expertise You Can Trust]

Built by Technicians, for Technicians

Our solutions are built and supported by **certified Ex technicians** with real field experience. SafeEx combines digital tools with **hands-on industry knowledge** to ensure compliant, reliable operations from day one.

Why SafeEx Expertise Matters

A strong digital solution requires real-world experience. SafeEx technicians bring hands-on Ex expertise into every project.

- ✓ Correct Ex configuration & asset structure
- ✓ Workflows aligned with IEC 60079-17
- ✓ Technician-driven root-cause insight
- ✓ Validated tagging, hierarchy & checklist logic
- ✓ Certified Ex Inspectors & Supervisors
- ✓ Field-proven workflows & implementation

85+ Years of Combined Ex Experience

20+ Dedicated In-House Ex Technicians

3 Senior Ex Technician Supervisors

Ex Inspection Validation

Technicians review your inspection setup, tagging, and routines before operational use.

Compliance Assurance

Workflows and configurations are verified against IEC 60079-17 and site standards.

Checklist Engineering

Checklists are structured and optimised by certified Ex specialists.

Tagging Strategy Design

Experts define correct tag logic, hierarchy, and equipment grouping.

Field-Ready Implementation

Digital workflows are aligned with real inspection practice through practical support.

Field Experience

Real-world insights from technicians with hands-on Ex inspection backgrounds.

Compliance Knowledge

Deep understanding of IEC 60079-17 and hazardous-area requirements.

Workflow Engineering

Optimised inspection and maintenance routines built on proven field practice.

Operational Support

Guidance ensuring your digital setup functions smoothly in real operations.
